THANK YOU
 Thank you for the outpouring of love shown to me and my family after the loss of my mother, Dorothy Talbott.

She was a wonderful mother, grandmother, aunt, and friend to so many people.

I also would like to extend a special thanks to Rev. Anita Bane, Kindred Hospice, Shady Oaks Nursing Home for their exceptionally great care of mom, and Dave Swank and his staff for making everything flow smoothly for the funeral. Also, thank to the UMW for serving a delicious meal.

My parents never knew a stranger and had a very happy life. May God bless you all.

Sandi Maulsby
 Diane & Justin Pierce
 Chad & Heather Maulsby
 Ron & Jamie Maulsby
 Shelly Talbott
 Jeff & Stacy Talbott
 & all their families

THANK YOU
 The family of Richard Hildreth would like to thank everyone for all of the ways they've reached out to us after losing our husband and father. Each of you are dear to our hearts.

Also, thank you to Pastor Jim Davis for the wonderful service and Dave Swank for his guidance and helpful supportive ways of putting us all at ease during our time of sorrow.

Thanks to Stewart Memorial Hospital and to Hospice for their kindness and care during his stay at the hospital. All are very much appreciated.

Ardeth Hildreth

Rick Titus in His **45th** Year of Selling and Installing More Efficient Fireplace Inserts & Vent Free Gas Logs

Rick Titus of Clarion started his business, called "The Country Store", in 1975 and even though he has moved into town now, he has no intention of retiring anytime soon. "I enjoy and love doing this," said Titus. "I've covered every corner of the state because I'm an expert, and that is not meant as a boast. I don't think anyone else in the state does exactly what I do."

What he does, is sell and install the Fuego Flame (brand name) fireplace insert, which he believes are the most efficient inserts on the market, for the money. However, it took him awhile to find out about that brand. "I was living in Littleton, Colorado, and came across a brochure for the Heatilator fireplaces, which were made at Mt. Pleasant, Iowa," said Titus. "When we moved back here 3 years later, I decided I was going to call them and become a dealer." Titus was soon displaying the units at county fairs and got some business. But then in checking back with his customers, to his amazement, he found out they were sending most of the heat up the chimney.

"I then tried selling other brands of fireplaces like Preway, and Majestic and found they were no better. These were touted to be energy efficient, having fans and adjustable dampers, but they still were not burning like a wood stove, so I just kept looking. I was selling wood stoves, but not everyone wants a wood stove in their home. Then I found out about the Fuego Flame Fireplaces, which were as close to wood stove efficiency as you will find. This company made Zero Clearance fireplaces and also made four different sized inserts, so now I could offer my customers a super efficient fireplace, or install one of the inserts inside of their existing wood burning fireplace, no matter how large or small," Titus said. But then it wasn't long before he found a fireplace that has an unusual shape, like a two sided, or see-thru, or arched opening, and these inserts would not fit. So he decided to just make the inserts from scratch to fit these unusual fireplaces. He even built an insert to fit a four sided fireplace for Bill Knapp In Des Moines.

The Fuego Flame fireplace inserts can make any fireplace burn up to 70% efficient, and needs no electricity while keeping 99% of the heat in the home. It burns slow like a wood stove will keeping the beauty of the fireplaces overall appearance and fun of watching the fire. Once the insert is installed, the average fireplace can heat 1,000 to 1,500 square feet of a well insulated home, while using 2/3 less wood, and protects the home from runaway fires. It can burn most of the night on just 3 or 4 hardwood logs, leaving you a nice bed of hot burning coals to ignite new logs come morning. "Some of my customers use the fireplace 24/7 all winter long, and rarely hear their furnace kick on. Thus they save a tremendous amount of fuel each month. These inserts literally pay for themselves by saving the customers fuel," Titus says. The inserts are made using 12-gauge steel, which Titus said transmits the heat quicker because it's lighter. Cool air from the house enters underneath the insert, and is then circulated up the back of the fireplace with the heated air exiting out the top, all without the use of a fan. The temperature of the air coming off this insert varies from 200 to 1000 degrees. Titus says, "You bake in your oven at 350, and you can feel that kind of heat coming out of the top of the fireplaces heat opening. Most heat circulating fireplaces do not come close to putting out that kind of heat, for they send all their heat up the chimney.

The Fuego Flame inserts are installed using an insulated ceiling, which prevents the stove heat from going up the fireplaces chimney. The insert damper control is on the inserts face plate, so you can close the doors and then close the damper. The inserts also burn with their damper 95% closed, thus making the wood burn nice and slow. The twin glass doors are made using ceramic glass, which will take 1400 degrees temperature, so you never have to worry about breaking the glass with heat, and you get to enjoy watching the slow burning logs inside. These twin doors are easy to clean with very little effort. "Remember when you were a kid sitting around the campfire, or at a family reunion, how much fun it is to sit around the campfire! Well, you can have that same fun in your home with a real wood burning fire in your fireplace all winter long, and enjoy the romance of

Pictured Rick Titus, photo by Les Houser, Wright County Monitor.

the flames; and everyone could use more romance, right! It is actually mesmerizing to watch the flames, and you don't even have to say a word as you watch the fire. Now you can have the romantic comfort of a campfire and enjoy all that warmth in your home safely and efficiently," said Titus.

For those that can't or don't wish to burn wood, Titus offers super efficient gas logs as an option. He started selling those in 1991, and they offer the same nice flame effect, but without the work and cleanup from real wood. "I've got people who bought a fireplace from me in the 70's and 80's that are now having me put gas logs in those same fireplaces," said Titus. These gas logs are capable of heating up to 1,000 square feet of the average well insulated home, so if you have a power outage, these gas logs will keep you toasty warm, and keep the pipes from freezing in your home.

Titus has covered a large area of the Midwest in his sales and installation travels. "I have built and installed units in fireplaces from Minneapolis to Kansas City and all over Iowa," said Titus. "I've learned that if I go to a county fair, I get business from that area." He also feels that word of mouth has been his best advertising, and that the personal attention he can offer gets the sales. "I do all the work myself," said Titus. "I don't even charge for estimates when I come into your home. I feel an in home visit is the only way I can know exactly what the customer needs." Titus is also not afraid to tackle, or at least look at, any

chimney problems including a cracked chimney. "I've fixed one of those many times for someone," said Titus. "I installed a stainless steel liner inside the chimney and made it safe and efficient." Titus explained that these inserts are not like others that you can buy, and that it takes some time to install them. "This is not a quick fix job," said Titus. I don't just shove it into your existing fireplace, collect a check and leave. Most of the other inserts on the market make your fireplace look like it has a wood stove shoved into it, and they change the whole look of the fireplace by putting a big metal shroud around the insert. It takes me from six to eight hours to do this, but it will be done right and you'll never need to do anything more with it." Titus has even thought of people who like to cook food over a wood fire. "I've developed a barbecue grill that will fit inside there," said Titus. "You can grill steaks or bake potatoes. It will work great for putting a dutch-oven in the fireplace too." Feel free to contact Rick at The Country Store for more information. You can call either 515-532-3881 or 515-293-2455, or visit his website at www.fireplacesatthecountrystore.com, or e-mail him at yahtitus@gmail.com. "We don't know what the future holds for our electrical system in this country," said Titus. "If someone wants to control us they could cut off the electricity, food supply, or disrupt our fuel. Everyone should have a way to heat their home without electricity."

AUCTIONEERS' NOTE: Make plans now to attend an outstanding auction of low houred, highly maintained farm equipment! After a successful 42-year farming career, Jeff has decided to retire and offer his equipment at absolute auction. You will find that Jeff and his wife Donna took great care of their equipment and every piece is well maintained. This will be a live, on-site auction with internet bidding available prior to, and live, during the auction. NO on-site buyer's premium. Complimentary meal available. Loader and operators will be available sale day. Not responsible for accidents, errors, or omissions. Announcements sale day take precedence.
